

Don't Forget

Tryhardninja

Breaking hearts
Who are you to do this?
You live your life like you're the only one
Who deserves to live
You made us cry
Made us miss our families
You used our souls and took control but now
Something's gotta give

What goes around, comes around, round, round
Goes around, comes around, round, round
You know what they say about dirty lies
Yeah that karma don't forget then you die

The time is now
For us to walk together
And carry out the dreadful verdict that
You brought upon your fate
No hide and seek
Cause the shadows give no shelter
It's time to face the rage behind the mask
That you yourself create

What goes around, comes around, round, round
Goes around, comes around, round, round
You know what they say about dirty lies
Yeah that karma don't forget then you die
Yeah that karma don't forget then you die

We are outcasts now and you're the reason why
We are, we see you haunt more souls
Just like a scream in the night
Our hearts are broken lost, forever bound
But at least we have each other now
While you're alone against the wall
Cause what goes around, yeah, comes around

Yeah that karma don't forget then you die
You know what they say about dirty lies
Yeah that karma don't forget then you die
