

# Infected

Tryhardninja

I buried  
Who I was  
Finally  
And I want it that way  
Here I sleep  
Frozen strong  
Flatlining  
Never wanted change

As bullet holes add up  
They crumble our wings  
Never fly again can never be free  
What doesn't kill you  
Will take everything  
No cure for our disease

Infected we are  
Infected we are  
Infected we are  
Infected we are

Familiar  
Like a ghost  
You broke through  
Between my dying breaths  
Universe  
In your hands  
There you were  
Asking for my help

We're treading the water  
There's blood in the waves  
I will keep the sharks and monsters at bay  
It might be selfish  
Don't care what they say  
Won't give you up to the plague

Infected we are  
Infected we are  
Infected we are  
Infected we are

Is it growing in you?  
Are you growing in me?  
Could you be fading my scars?  
Corpses and nightmares  
That's all that there was  
You burned them away like a star  
Dirt in your nails see you scratching away  
Beating my sick broken heart can't awake  
Look for a pulse  
Am I buried too deep?

Infected we are  
Infected we are  
(Is it growing in you are you growing on me?)  
Infected we are

Infected we are  
(Is it growing in you are you growing on me?)  
Infected we are

I promised I would keep you safe  
The world is gonna have to wait  
I promised I would keep you safe  
The world is gonna have to wait  
(Infected we are)  
I promised I would keep you safe  
The world is gonna have to wait  
I promised I would keep you safe  
Infected we are
