

## Pick a Universe

Tryhardninja

We can pick a universe let's go [2x]

Feeling under pressure  
Studying all day and night  
Waiting for the weekend but it's take, take, taking its time

Get it off your shoulders  
And forget it all tonight  
Power on and then let's make a break, break, break  
Straight for the galaxy inside your room  
When the mundane just won't do (won't do)

Whether it's rain or shine  
We can leave it all behind  
Anytime you're feeling low  
We can pick a universe, let's go

We can board an 8 bit plane  
Make a daring great escape  
Anytime you're feeling low  
We can pick a universe, lets go [2x]

Working counting minutes  
End of day is on delay  
Every hour longer than the last, last, last  
That's ok

'Cause when it's over  
There's another Earth that waits  
So just let it go  
Let's make a dash, dash, dash  
Straight for the galaxy inside your room (your room)  
When the real world just won't do (won't do)

Pick a universe, any universe, let's go  
Like magic hitting start unlocks the door  
Pixel cosmos for every boy and girl  
'Cause everything is twice better in a 2D world  
So let's escape, escape to any, any place  
Where we can live two times and replay, replay  
Any stage 'til it's right as long as you save  
So Kit-Kat take a break get away, away

Through a portal then we can have some cake tonight  
Or we can bake one just in case that cake's a lie  
'Cause here in Minecraft you can make what's on your mind  
Don't like the real one?  
Build whatever world you like
