Under Control

Tryhardninja

Come out and play, come play with me
Don't be so scared, it's all I need
Don't look at me like I'm deranged
There's work to do, you're in the way
It's breaking me, night after night
So many victims, so little time
The constant voice inside my brain
Say you can't leave so time to play

Mayhem, mayhem, three, two, one
Count down to sunset
Hope you came prepared to run
Tell me are you having fun yet?

They call me insane but they don't know
How my name strikes fear into your soul
Yeah my mind, it might be blurry
And there's glitches in the code
Stitched together but don't worry
It's all under, under control

I skip and scout the dimlit halls
Adhering to the protocol
The very rules you aim to break
This can't and won't go down this way

It is just a glitch scattered in the system
Tell me that it's wrong, never gonna listen
World won't understand till they see the vision
Mayhem, mayhem, three, two, one

They call me insane but they don't know
How my name strikes fear into your soul
Yeah my mind, it might be blurry
And there's glitches in the code
Stitched together but don't worry
It's all under, under control

I understand
Don't worry
Yes, I'll take care of it
I know how important this is
They won't
I can handle it
It's all under control
It's all under control

They call me insane but they don't know
How my name strikes fear into your soul
Yeah my mind, it might be blurry
And there's glitches in the code
Stitched together but don't worry
It's all under, under control
