With You

Tryhardninja

Ooh Ooh
Wake to another daydream a cubeland fantasy
Ready for all that today might bring with you
Monsters in the shadows they don't bother me
'Cause side by side I'll brave anything with you

Hurdles in our path it's alright
If there's a block to move

We can bear the weight standing shoulder to shoulder
Through the heavy rain I will, will be your cover
From all that creeps in the night
As long as I'm with you we will survive

No matter the danger explore the deepest seas
And darkest caves I know I'll pull through with you
Climb the biggest mountains to their highest peaks
They don't look as tall as they use to with you

Hurdles in our path it's alright
If there's a block to move

Ain't no river wide ain't no valley low enough
To shrink our field of view

Got our sights set high nowhere we can't go
Touch the sky when I'm with you

When I'm with you
With you

As long as I'm with you we will survive

As long as I'm with you we will survive
