

# ELEVATE

Tsu Surf

I hate to see a homie fade out  
But there's no way to elevate down  
It's hard to let a good thing go  
Ya, but I need great now  
Stagnant, isn't where I stay now  
I just had to move my things out  
In a better head space now  
Had to let some homies fade out  
Had to let some homies fade  
Fade [x3]  
Elevate [x4]  
Walk away  
Away [x3]  
Let em fade, fade, fade, fade, yeah  
Fade [x3], Elevate [x4]  
Walk away  
Away [x3]  
Let em fade, fade, fade

Why the love don't come to stay  
Actually the closest thing to love, is the fucking hate  
Good thing about a bad day, it turn into another day  
Taking life to serious, seriously take the fun away  
Ya problems go with you, how the fuck you tryna run away  
You, probably run track good  
I just mixed some cookies with my problems, in a backwood  
They think that I'm sick cause of these baguettes and that I rap good  
I done fed undeserving snakes, they just act good  
Whip sit in park  
Looking for the blunt that you ain't finish, tryna spark  
You can google everything except a broken heart  
Gray was in my dream said he wished we would of talked  
You pop up out your sleep, sweat, staring in the dark  
He ain't even make a wish, miss cuz crazy got me feeling like a bitch  
You can have a mill, without love, that ain't rich  
You can have a mill, without love, that ain't shit
