

Fixer Upper

Tub Ring

Building something special
For all of us to revel
Masterpiece of modern level
By design

Put it all together
Impressing the investors
Now it's on and never better
Doing fine

A system in rhythm
A fission
Colossal ambition
The mission
Best laid plans gone to waste
Like running in circles all day

Everything's working like it should
When nothing is working like it could
Everything's working
When nothing is working
Looks like we've fixed it for good

Present past or future
A problem the solution
Consciousness de-evolution
Going rogue

Aging toward regression
Compulsion then obsession
Learn that lesson second guessing
All is broke

A vision decision condition
Resistance persistence collision
The best laid plans gone to waste
And all of your outcomes replaced

Everything's working like it should
When nothing is working like it could
Everything's working
When nothing is working
Looks like we've fixed it for good

Now there's winners
And there's losers
Beggars can't be choosers
Engine stutter
Fixer upper
Pushing buttons
Form and function

Engine stutter
Fixer upper

Looks like we've fixed it for good
