

# Kill Me Tonight

Tulisa

I'm like a rebel, I can't seem to stop  
Who am I kidding? Bitch, I am on top  
Parted buds in my flashing cameras, give me a shot  
Seven days a week and the party goes on

Making great marching angers  
Can't come through to make it in though  
You can taste my flavor  
Of my worse behavior

Fortune teller predicted  
My career gon bewicked  
But my love life ain't shit, cheers  
Let's drink to it

I've been here before  
And I know that I'll be back for more  
I'm just living my life  
And I hope it don't kill me tonight night night  
I hope it don't kill me tonight, no  
I'm just living my life  
Hope it don't kill me tonight, no  
I hope it don't kill me

How did I get here? I'm out of control  
Out every night, I miss taking it slow  
Drinking like a fish til I'm feeling sick, cleansing my soul  
It's only Monday, I'm already gone  
Driving, head high the window  
Pon demise down the main road

House in store for the rebel  
I don't even need my bloke

Fortune teller predicted  
My career gon bewicked  
But my love life ain't shit, cheers  
Let's drink to it

I've been here before  
And I know that I'll be back for more  
I'm just living my life  
And I hope it don't kill me tonight night night  
I hope it don't kill me tonight, no  
I'm just living my life  
Hope it don't kill me tonight, no  
I hope it don't kill me

Thank God thank God thank God...

It started to make me feel much better somehow  
I'm starting to feel like nothing matters right now

I've been here before  
And I know that I'll be back for more  
I'm just living my life  
And I hope it don't kill me tonight night night

I hope it don't kill me tonight, no  
I'm just living my life  
Hope it don't kill me tonight, no  
I hope it don't kill me  
I hope it don't kill me tonight night night  
I hope it don't kill me tonight, no  
I'm just living my life  
Hope it don't kill me tonight, no  
I hope it don't kill me tonight

Thank God thank God thank God... (I hope it don't kill me)  
Thank God thank God thank God...
