

# Nightlight Girl

Turnover

Tangled up with you in the night  
Finding new reasons every time  
I know you don't see them in the mirror  
Don't you know? I'm not using my eyes  
When it's this late  
We've got the lights down anyway

Cause you're a nightlight girl and you just glow  
Nobody's outside  
For all that we know  
What's inside your imagination  
It's as real as anything else  
I'll show you what it's like to be loved  
If you can't do it for yourself

Tangled up with you in the dark  
Love when you're loving who you are  
Your bones have curves  
Your skin's got lines  
And that's the way that you were designed  
And you can do it by yourself  
Yeah, you don't need anybody's help

Cause you're a nightlight girl and you just glow  
Nobody's outside  
For all that we know  
What's inside your imagination  
It's as real as anything else  
I'll show you what it's like to be loved  
If you can't do it for yourself

So push away, just push away all the things you ever heard  
Or ever saw or they told you  
It's harder to do than just say that you know  
That beauty is in the eye of the beholder

I want to watch you while you glow in the dark  
Want you to realize you can glow if you want to  
You've got to love yourself for all that you are  
Want you to know that baby, you are my nightlight girl
