

Gravity

Turnstile

Right now, break me out. Show me how to feel
No doubt I've been living a lie
Something over my eyes
Stuck inside, scared to make a sound

I keep me down
It's just the gravity I keep around

Expose to fear, pound it out
And forget about self-doubt
Because I've been living a lie
Something over my eyes
Hard to lift my focus from the ground

I keep me down
It's just the gravity I keep around
