It's okay if you cry when you want to
It's not unreasonable
When a tear dries, a smile lights up your face
Look, you are already laughing

The future is confusing
But I won't lose to its brilliance, I want to have courage

Every day and night with you
I hold your small hand tightly
Every day, every night, everywhere
Let's always make sure our feelings are connected
Now, let the story begin

You avert your eyes, do you plan to avoid me?
But I like you
Even when we are separated, we can share something
Yes, if we have these feelings

I can't say "goodbye" to yesterday yet
This smoldering time is just lifeless

Every day and night with you
I just don't know what to do with this ceaseless fever
Every day, every night, everywhere
Let's gather up our feelings more and more
Now, you and I begin

You're really just like me
(Baby I need your love, need your touch)
Oh, baby I need your love, need your touch baby)
Scared of the darkness of the night (you tell me now)
But you're not alone

Every day and night with you
I take your quivering hand and hold it tight
Every day every night everywhere
Let's always make sure our feelings are connected
Now, let the story begin

Every day and night with you
I just don't know what to do with this ceaseless fever
Every day every night everywhere
We'll gently overlap our destinies
Now, just the two of us begin
