oooooo oooooooooo

If the words spoken between you and me made a song
What would your favorite melody be?
Even if the world suddenly changed overnight
With you around, we can sing the duet

Neither complicated reality nor unforeseeable scenario
Ever scare us as long as we stay together
I'd rather lose the light illuminating my life
Or dreams filling my mind than lose you

Don't forget, don't forget
That I love you

I want you to know, I want to protect you
With my everlasting eternal love
I love you, so love you, my everything is yours
So come here and stay by my side

If the time you and I spend together became a song
I would play a little sad note
Because happiness prefers friendly people
It's a duet filling the space between us with 2 notes

Neither groundless rumors nor startling bad jokes
Ever misleads us, as long as we hear them together
I tell you what, your happy face is my motif
Whatever I do
I will never hurt you

I won't change, I won't change
Because I love you
I want you to know, I want to wrap you in
With my wholehearted selfless love
I believe you, really believe you, I'll live for you
So come here and stay by my side

Carrying you, carrying both of us
Colorfully played melody runs through the air
Carrying further, carrying our hearts, joining to become one
Not yet time to end, it's a never-ending duet

It's the treasure
You always give me
Your tears, your smile, please share them both with me
Together we can brighten up tomorrow
Even in dark, long, cold nights
So come closer and stay with me

Don't forget, don't forget
That I love you
I want you to know, I want to protect you
With my everlasting eternal love
I love you, so love you, my everything is yours
So come here and stay by my side
