You go on and on about the situation, try to verify any little details
You just worry too much about negative factors
Take it easy, relax
If you make a mistake, ok
It's an encounter with the unknown, you should feel so good

Every day, every time
Come here, sweet girl
More and more kiss, all night long
My baby come to me
Tomorrow will take care of itself

I love you, love you, love you
Let's deepen our love, just enjoy ourselves
I want to know you more
I never want us to part even in the dream
With an easy mind, with an easy mind

When you are imprisoned by stress
Put on a headphone to shut out it
Just say "never mind"
No matter how you hurry up
We are all on the same earth after all
At the same speed, together go round and round

Every day, every time
When I hug you, hot stuff
I can't sleep cause of you
Don't worry, be happy
Until your mind is emptied

I love you, love you, love you
Let's deepen our love, just enjoy ourselves
Every time I see that crazy look in your eyes
I'm in heaven
With an easy mind, with an easy mind
With an easy mind

Oh, stay the way you are
Oh, with an easy mind

I'm here for you
With an easy mind oh yeah
Never forget it
With an easy mind yeah yeah

I love you, love you, love you
Let's deepen our love, just enjoy ourselves
I want to know you more
I never want us to part even in the dream
I love you, love you, love you
Let's deepen our love, just enjoy ourselves
Every time I see that crazy look in your eyes
I'm in heaven
