Don't be afraid of the future
Let's go
Get going on

If there was another future
In which you and me met
What kind of love would we have for each other?
Close your eyes 'cause I'm bringing you there, let's go

In the small street corner that I saw in my dreams
Baby, if we laugh together or join hands or
Stare at each other

Something will begin, going, get going on
Moving to the next place, going, get going
If we live just as we are
Someday this will become our answer

Instead of hesitating about things we don't know
Let's try and enjoy this 'beginning'
Like an attraction opening its doors to the fun ahead
You don't hate that, don't you? let's go

If yesterday is a pattern we grew too used to then we'll just stop
Baby, worrying and holding back will eventually
Turn into courage

Something will begin, going, get going on
Moving to the next place, going, get going
If we live just as we are
Someday this will become our answer

The wind that will set our hearts free
Is starting to blow
Now singing a melody of hope
Singing, singing

Something will begin, going, get going on

Moving to the next place, going, get going
If we live just as we are, someday
This will become our answer
This will become our answer

Don't be afraid of the future
Let's go
Get going on
