I was born for the revolution
Open eyes that shine light
The beat that's begun moving goes tick tock
A time trip to change 10 years before

Count the moments you wake
Go back to truth and justice
Stand up without giving in to your situation
And stop the period of chaos (it's up to you now)

Cause we are humanoids
Sink or swim there is a road
Yeah we are humanoids
What do you value? there is a love

A distorted space, gotta getcha, future
It's the future, everybody's waiting humanoids
Utopia of the fourth dimension, human nature
It's the future, everybody's waiting humanoids

Your meaning of life is already perfect
A scenario where you held up your faith
The questions swirling in the world
The time to answer them is now

Your naked soul will scream out
The uncovered naked truth
Stand at the crossroads and do or die
Yeah the one to decide is (it's up to you now)

Cause we are humanoids
Sink or swim there is a road
Yeah we are humanoids
What do you value? there is a love

Disclosure of the hidden truth
It's the future, everybody's waiting humanoids
A rocket launcher for the days without pride
It's the future, everybody's waiting humanoids

Surely everyone knows the answer
From the start
The future of the past you're in
For your life will you choose?

Everybody makes some noise

Cause we are humanoids
Sink or swim there is a road
Yeah we are humanoids
What do you value? there is a love

A distorted space, gotta getcha, future
It's the future, everybody's waiting humanoids
Utopia of the fourth dimension, human nature
It's the future, everybody's waiting humanoids
