There's no substitute for you
My treasured person
Noone else can take your place
My precious you
Believe me when I say you are my light always

Even though you were with me I lost sight of you
I kept searching for dreams in the distance
The place that I could return to and rest my heart
That's where I realized true happiness

Surely if I were alone
I wouldn't have been able to overcome anything
The person I want to protect
Whose smile has given me courage It's you

There's no substitute for you
My treasured person
Noone else can take your place
My precious you
From now on we'll always be together

(We'll) Be alright
Love is always here
So let's move towards the future
Believe in everything
You are my light always

The true me that exists depends on your kindness
While pretending to be tough
Even when anxious
I walk into the burden with all my tears

Surely you know that at the same time
You'd have to keep walking
That's right, always about you
I know

I want to hold you
My treasured peson
I hope that you always smile
With happiness
Even when we're apart

I murmur your name in my heart
Thank you, because I have a place
To return to, I can fly high
Everything, night and day
You are my light always

There's no substitute for you
My treasured person
Noone else can take your place
My precious you
From now on we'll always be together

(We'll) Be alright
Love is always here
So let's move towards the future

Believe in everything
You are my light always
