I'm only one

聞こえる 君 君
I'm only one heartbeat away

Even if I wake from my sleep, it feels like I'm dreaming
My finger is still cut with your fragrance
Your soft lips, that night
Because we were so shy we didn't say anything

I've felt my heart

For the first time so full of this fluttering
I'm your man

Over every night and over every day
Stay by my side only
To fill the empty left side of my heart
Will you become my girlfriend?

Look carefully, you're inside my eyes
I'm only a heartbeat away

Even the boring days, I just laugh and get over them
Just for the days we promised to meet, I wait every day
As I'm loving you, I must be becoming more like you
This side of me that I've never seen is awkward

This fluttering that I've felt
For the first time so full in my heart
So that I can feel it

Over every night and over every day
Stay by my side only
To fill the empty left side of my heart
Will you become my girlfriend?

Look carefully, you're inside my eyes
Yeah only one heartbeat away

Silently close your eyes and turn around
The wind carries these words (my voice)

"I love you so much, my heart might explode..."
I'm the only your heartbeat

Every night, everyday
The world becomes more beautiful
The moment I saw you
You were the biggest present
The heavens have sent you to me, my only one

Over every night and over every day
Stay by my side only
To fill the empty left side of my heart
Will you become my girlfriend?

Look carefully, you're in my eyes
I'm only one

I'm here to love you
I'm only one heartbeat away
