

## Wait for Love

**Tweedy**

Honey I'm worried the fire is cold  
Our tired souls have lost their way  
Stay home and find the song fading away alone  
And strange, out of range

I've heard you say  
Dreams don't matter  
That's why we hold on as the days pass  
And wait for love

Arm and arm  
Waltz through the distant days  
The scattered parades  
As the sweet slips away

Oh I guess you'd say we don't matter  
And I bet that could be true  
But I still wanna look in your eyes and  
Say I'll wait for you

Oh I guess you'd say we don't matter  
And I bet that could be true  
But I still wanna look in your eyes today  
And wait for love  
Let's wait for love
