

Can't believe you're gone for good
Someone chopped you down
Thought you'd just fall in the woods
But she heard that sound
No I don't, no I don't remember
Last we spoke
No I don't, no I don't remember
Remember
Remember
Remember

I look back in time in time through a telescope
I've been catching my
I've been catching my
My reflection already looking

Most are blown down in a storm
But the wind was tame
You weren't waiting anymore
Were you sad or brave?
No I don't, no I don't condemn you
Back and forth
No I don't, no I don't condemn you
Condemn you
Condemn you
Condemn you

I look back in time in time through a telescope
I've been catching my
I've been catching my
My reflection already looking

You tore me up more than you know
You tore me up more than you know
You tore me up more than you know
You tore me up

I look back in time in time through a telescope
I've been catching my
I've been catching my
My reflection already looking
