

# Twilight Horizon

## Twilight Force

The darkness is falling  
The winds of the power are calling  
We fly on the wings of fate  
Towards the gate of shadow

Now, we're on our way  
The fate of the world is in our hands  
The stars will lead us, never deceive us  
On our quest for glory

Ride into the night  
So far from the light  
There is a power we must fight  
To rid the shadows from our lands

The power of the dragon  
Will guide us, to the twilight horizon  
Ancient spirits whisper  
Of times, of honour and of pride  
Come stand by my side and we will ride  
With swords in our hands  
Like thunder in the sky  
Our flame will never die

The warriors will gather  
And honour the dragons together  
We cast our holy spell  
To end the hell, forever

Ride into the night  
So far from the light  
There is a power we must fight  
To rid the shadows from our lands

The power of the dragon  
Will guide us, to the twilight horizon  
Ancient spirits whisper  
Of times, of honour and of pride  
Come stand by my side and we will ride  
With swords in our hands  
Like thunder in the sky  
Our flame will never die

The power of the dragon  
Will guide us, to the twilight horizon  
Ancient spirits whisper  
Of times, of honour and of pride  
Come stand by my side and we will ride  
With swords in our hands  
Like thunder in the sky  
Our flame will never die
