

Dominoes

Twin Shadow

I'll take you where you're coming from
And hold you when the thrill is gone
If you want, I'll go along
You take it from here

Always fallen dominoes
I know it's late, you gotta go
Put on your coat, you'll catch a cold
Take it from me

I look inside of you
Then I'm totally open
If my heart is an ocean
It's totally blue

If I had a clue
I would play with devotion
I would melt where you're frozen
All that for you

Haven't changed, it's been awhile
You'll notice from my nervous smile
You'll hear me when you turn the dial
That it's still me

Wonder where you're traveling
Way off the coasts you love the most
Well, here's a toast, I'm babbling
Hate the weight of gravity
Get free

I look inside of you
Then I'm totally open
If my heart is an ocean
It's totally blue

If I had a clue
I would play with devotion
I would melt where you're frozen
All that for you

I look inside of you
Then I'm totally open
If my heart is an ocean
It's totally blue
