

# Go

Twista

What's it gonna be, with you and me?  
Don't even know, all I can say is  
Gooooo (go, go) gooooo (go, go) goooo (go, go, go, go)  
Only time will tell, if we meant to fail  
If we're gonna win, all I can do is  
Gooooo (go, go) gooooo (go, go) goooo (go, go, go, go)

Now you better move forward, if you're thinkin life is about change

You was thinkin it'll be forever, but nothin stayed the same  
I know you wanna make it work and they told you that they ain't never gon' leave

You depressed and can barely breathe, wit yo' emotions on yo' sleeve

You could fuss with them, you could fight with them, you can even disagree with them

But if love gon' last you could tell it over time if you really meant to be with them

If you're ready for the drive, let the future take yo' side  
You don't even got a seat, put the pedal to the metal, trust in yo' faith and ride

No need to be worried about all the drama and talk, eyes straight

Don't know where to go then don't look, just walk, blind faith  
Cause you in love even though you know how crazy they can be  
We can only try to make it work, we just gotta wait and see

Sometimes you won't know, where life is gon' take us  
But I know you better be about business, and you gotta stay on yo' paper

Everybody got work, but do you really know what work about?  
And everybody got problems, all you can do is try to work 'em out

I'm all with a brother lovin his mother and takin care of another because he know God

Just put one foot in front of the other and see what you can discover when you go hard

Ain't no reason for y'all to look back now, take a stride and go on and move forward

And I believe in miracles, when you see the light then go on and move toward

If they can get it I can get it

You can get it if you a baller, if you a baller

And if they can get her I can get her

If you want her you better call her, you better call her

And what you wanna see, is
