The monster in the dark, kill 'em all and then I left
Jump with no kinda net to intercept me 'fore I reach my death

Every time you feel the chills and your hair stand up
That's me watching - that's me watching
You should be careful what you do, right or wrong
That's always me to judge you - I judge how I feel
I used to be mortal, now I'm not
I tear your world down in 3D
Down on your knees and pray, feel it in the air
Feel my spirit near you - I'm always watching

Yes, welcome to where the knights in shining armor die
Harm and discomfort is something that's life is quite uncommon, I
Want you to wanna try
I am the overlord of the overboard and I walk amongst the lightning coming f
rom the sky
Swarm the productions and eat them all, it's nutrients bona fide
Dormant at the doorway to the depth of the deep thought, just come inside
Creature from the Black Lagoon, Candyman, Norman Bates if you will
Warm plates of hatred, faces of my enemies taped up in seal
Stapled and frozen deep in the basement, I hate them for real
Is what my former therapist said all of these statements reveal
I don't wanna talk about it, every time you feel the chills
And your hair stand up it's me watchin', we locked in, be still
We workin', we clocked in, we do things differently
It's true there are people that love you bitch, we not them!
Scatter the body and gather up every part
Any way you wanna do it I be ready, monster in the dark
