

One Night on the Street

Twisted Wheel

What else could you do? What else could you do?
they left you all alone
no warmth or place to shelter
so far away from home
got some clothes out of the clothes skip
got dressed up made a night of it
now you're warm and feeling high
when you're tucked up they come alive

one night on the street

next you made some friends
Colin in a pinstripe suit
bag by his side of stolen property
doing things he should not do
there's werewolves somewhere in Camden
you're in massive danger
but no way frightened
forever you'll be their for the night
and I don't want to die

Lost yourself, lost yourself
lost yourself again

one night on the street

The birds are tweeting
and you've lost your money
cramps pains knots are in your tummy
nowhere to shelter its wearing off
hotel hotel yeah
