

# Ignite

Twiztid

All my life they highly doubted me  
Never discredit build my own path few regrets come out of me  
Always ran  
Just plan my position spittin the sickness  
Hitting or missing they concisions ain't strong enough to mention boy  
These dudes really know how to push a button  
Damn they lovin being up in my business  
What was it  
Way I did what I wanted to do  
You couldn't do it too  
So you had to prove hate is all you fucking do  
Yeah I'm still spitting though  
That's how it was written so  
Never will you beat me hoe  
Bitch catch my past flow  
I don't know no other hoe  
Can I be the story scope  
Out your dream state  
I am the knife  
Man you build rope  
Your whole team up and delete they self-esteem  
Me and the MNE team got a thing for doing max damage to the underground sound so we leading  
Who the fuck am I to say  
I am the ROC speak

How'd you get me underground under that late night  
You could never ever see my face it's a rave light  
Never will I ever let it be safe let the braves fight  
I will never fall no walls let me ignite  
How'd you get me underground under that late night  
You could never ever see my face it's a rave light  
Never will I ever let it be safe let the braves fight  
I will never fall no walls let me ignite

My mind is racing  
But time is wasting  
My life is mainly being high and lazy  
But my rhymes are fading  
I'm trying but failing  
Seeing signs  
I may be being lied too lately  
They like why she play me  
Baby why she say things  
Reply she hates me  
Every time she takes me  
On a ride this cake beat can't hide she angry  
All the time it makes me grab the nine and blaze three  
In her spine then break bread till she die escaping  
Is the night I'm crazy and im high please save  
From my mind I'm shady and I'm lying just maybe  
I reside in Hades burning fire and satan and desire  
But wait he's in denial  
I'm basically your highness  
Brings me a lion and ape  
And we can die any day  
But ima lie here and wait

This is a dire mistake  
I'm spitting right in your face

How'd you get me underground under that late night  
You could never ever see my face it's a rave light  
Never will I ever let it be safe let the braves fight  
I will never fall no walls let me ignite  
How'd you get me underground under that late night  
You could never ever see my face it's a rave light  
Never will I ever let it be safe let the braves fight  
I will never fall no walls let me ignite

When I ignite its time to fight  
Smack you in the face with a tailpipe  
And its bye bye or die die die  
Eye for an eye  
I've learned over time is the only thing that holds this whole world of cold  
words together  
The focus is the bears locked in a safe  
Never mistake takes  
Serious before you end up in a lake  
While we evolve like be evolve  
And we pride and resolve  
Legendary legacy spit hell at the heresy

Get it lit  
Flames attire then the funeral pyre  
Watch life expire  
Dressed in a summit attire  
Like a bullet in the wire  
Big gauge and then rage  
Locked up and chasing till myself up out the grave  
Bitches still ain't safe  
If you get rhyme plated  
Like the torches in a raid eviscerate eliminate  
They competition is land from where I stand  
Cause I took their life up out the motherfuckers with my bare hands

How'd you get me underground under that late night  
You could never ever see my face it's a rave light  
Never will I ever let it be safe let the braves fight  
I will never fall no walls let me ignite  
How'd you get me underground under that late night  
You could never ever see my face it's a rave light  
Never will I ever let it be safe let the braves fight  
I will never fall no walls let me ignite
