

Light It Up

Twiztid

I could take your favorite rapper in a matter of minutes
Dig a lyrical grave and dump his ass up in it
I ain't never afraid I'll push the gas to the limit
An' we can all run the fade an see who choke at the finish
My eyes diminish from the skies I visit an it provides
A vision from all the vibes I'm givin I don't wanna lie
But I'm gettin so dry from spittin my mouth
Is feelin like it's something that all the god's forgetting lite up
Smokin rappers out the pipe bruh
They don't like it in my fight club
They all say they got the right stuff
100 strains an' I don't like one

If I gotta bring the smoke like a chimney (lite it up)
No joke I got it in me (lite it up)
You just wanna be the most I don't envy (lite it up)
You never wanted the smoke quit pretending
Light it up or get lit up, get lit up
Lite it up or all of y'all can get lit up
Light it up or get lit up
Lite it up or all of y'all can get lit up

Off the dome like cerebral
This is the hyperlink to hyper shit to stir the blood in the people
A site to see they might believe a vision being retold
Through the eyes of the sculptor look it watch it as they re-mold
Recalibrate and reload this upload look
And all scary shit aside I understand if they shook
Attention attention, a terabyte of unreleased floating
In the suspension and they speaking of recognition or acknowledgement
Speak of hard times and come up
Long days of watching the moon down and the sun up
Always staying high in the grind with a grin
We the opposite, you can get with us or get with them

If I gotta bring the smoke like a chimney (lite it up)
No joke I got it in me (lite it up)
You just wanna be the most I don't envy (lite it up)
You never wanted the smoke quit pretending
Light it up or get lit up, get lit up
Lite it up or all of y'all can get lit up
Light it up or get lit up
Lite it up or all of y'all can get lit up

Kinda crazy ain't it how I'm constantly faded
An anomaly hated but it don't bother me
Waited outside in the lobby it's rainin an' it's complicated
I just wanna smoke without eyes an' get elevated
Like an elevator I'm high an' intoxicating
The vibe is alive an' I know it's a lot to take in
Push it all aside an' be a part of the start of greatness
Meet me at the car an' let me show you a jar of what the god's created

If I gotta bring the smoke like a chimney (lite it up)
No joke I got it in me (lite it up)
You just wanna be the most I don't envy (lite it up)
You never wanted the smoke quit pretending

Light it up or get lit up, get lit up
Lite it up or all of y'all can get lit up
Light it up or get lit up
Lite it up or all of y'all can get lit up
