light the way

Twiztid

Floating over stars
Hover over moons
To the depths of the mind
And the heights of altitudes

I would complain but nobody's listening
If I had a million for every time a decision went
Off the rails and down to hell with me
Face to face with me and my anxiety

Break me out of my head
Wasted time
Rebound, regret, regress
Fall behind

Get outta my head
Controlling my life
Take everything except my will
And strength to fight
There's no giving up
Dig deep down inside
Take everything except my will
And strength to fight

Changing moods like altitudes

Why should I change when everything
Stays the same?
Repeating the same old patterns and
Stuck in them same old ways
My mind feels like it wants to explode
Delete memory
Information overload

Break me out of my head
Wasted time
Rebound, regret, regress
Fall behind

Get outta my head
Controlling my life
Take everything except my will
And strength to fight
There's no giving up
Dig deep down inside
Take everything except my will
And strength to fight

Floating over stars
And we hover over moons
From the depths of the mind
To the heights of altitude
Changing moods
Like altitudes
We hover over broken moons
And the stars will light the way
And the stars will light the way

Get outta my head
Controlling my life
Take everything except my will
And strength to fight
There's no giving up
Dig deep down inside
Take everything except my will
And strength to fight

Get outta my head
Controlling my life
Take everything except my will
And strength to fight
There's no giving up
Dig deep down inside
Take everything except my will
And strength to fight
