Uh huh yeah hell yeah Uh huh uh huh hell yeah

No stopping and no breaks bi-product

Money moves and just sit [?] grown man emulates

Too many cooks in the kitchen with fake hand shakes

Everybody worried about what the next man makes

The focus on the own just stacked like pancake

I'm all up in the zone feel the need to translate (ah)

So get right, stack up forward to the future time travel like you're robbing tut

Sometimes you got to move and miss the uppercut

Went from being pizza face turned into upper crust

I want to live large like your momma but

Swinging to the beat in tight pants with her hands up

Dance to the rhythm nod if you can't
You ain't got no time for no bullshit
You [?] they understand
Sick and tired of your life feeling useless
Break the stress and let shit pause
This for you and that's because
You know, you know how they treat you
They win they win they defeat you
You know, you know how they treat you
They win they win they defeat you
Break the stress and let shit pause
This for you and that's because

Use the energy they want you to lose too and
Win like a champion and make them get used too
Allow me to reintroduce you to a new view and
Drive your motivation and possess you to run through
Walls big barricades taking all them life lemons and
Making some lemonade I'm really happy for you if you really can't relate
Now tell me why your life is so great (for real)

Dance to the rhythm nod if you can't You ain't got no time for no bullshit You [?] they understand
Sick and tired of your life feeling useless
Break the stress and let shit pause
This for you and that's because
You know you know how they treat you
They win they win they defeat you
You know, you know how they treat you
They win they win they defeat you
Break the stress and let shit pause
This for you and that's because

Hell yeah ah hell yeah
This for me
Hell yeah
(Hahaha)
