

All For Me

Two Friends

I know I was made for your touch
'Cause I got nothing without you
So baby, I thank God for your love

There's nothing like us
'Cause I don't want nobody
Unless you're that somebody, yeah

Cold bed
I'm locked up in the same room
And I caught myself thinking 'bout you
Holding
Onto every word I left you

Just one sip
I bet you'll love the taste
Take me back to when you were all for me
I wish
We'd never gone this way
Take me back to when you were all for me
Take me back to when you were all for me

Am I crazy or what?
Could we wake up in your bedroom
And hold you like I used to

Have I been drinking too much
If I think I could call you?
My friends all tell me not to, yeah

Cold bed
I'm locked up in the same room
And I caught myself thinking 'bout you
Holding
Onto every word I left you

Just one sip
I bet you'll love the taste
Take me back to when you were all for me
I wish
We'd never gone this way
Take me back to when you were all for me

(All for me, you were all for me...)
Take me back to when you were all for me

Just one sip
I bet you'll love the taste
Take me back to when you were all for me
I wish
We'd never gone this way
Take me back to when you were all for me

(All for me, you were all for me...)
Take me back to when you were all for me
