

Forever

Two Friends

You want me forever
You need me forever
You love me forever
I told forever
I could use you forever
Could say it's forever
But I don't know what forever means

All my life you came through the ground (love you forever)
I need need, need you forever (even though even though we got turned around)
All my life came through the ground (love you forever, I need you forever)
Even though, even though it got turned around

Love you forever

Need, need you forever

Cause you want me forever
You need me forever
You love me forever
I told you forever
I could use you forever
You say it's forever
But I don't know what forever means

All my life you came through the ground (love you forever)
I need need, need you forever (even though even though we got turned around)
All my life came through the ground (love you forever, I need you forever)
Even though, even though it got turned around

Even though I cried
I could tell you there was a time
When my words had meaning
And my heart wasn't bleeding

x2
Cause you want me forever
You need me forever
You love me forever
I told you forever
I could use you forever
You say it's forever
But I don't know what forever means

All my life you came through the ground (love you forever)
I need need, need you forever (even though even though we got turned around)
All my life came through the ground (love you forever, I need you forever)
Even though, even though it got turned around

Cause you want me forever
You need me forever
You love me forever
I told you forever
I could use you forever
You say it's forever
But I don't know what forever means
