

# Black Swan

TWRP

Under the dawn arisen  
Of ultraviolet suns  
Deep in the cave beneath the Avalon  
Emergency transmission  
Lighting up an empty screen  
Beamed from the planet of the galaxy queen

"This is a black sky bounty  
There's an assassin on the run  
I want him dragged down and brought to me  
You're the only one"

I dusted off the mantle  
The weapons of my trade  
Faint with the echoes of my past accolades

Ooh, I challenge you  
Let's see what you can do  
If your legend is true

Scared of a black sky bounty  
I'm blasting off into the dawn  
And like a black swan

My halcyon days are over  
Now I'm just flying along  
The radar locked  
On targets long gone

You are mine  
For war, it's time  
All hope gone  
For you, Black Swan

My heart is racing  
Full speed right through the field of stars  
I can't resist the deadly charge  
The light I'm chasing  
The fire that makes us what we are  
I close the distance from afar

Past your prime  
With pride, you're blind  
I feel your fear  
Now feel my wrath

First shots are fired  
My past and future lives collide  
The target turns to meet my eyes  
One joust required  
I find the strength beyond the lies  
And ride as my enemy dies

Don't stop! Halcyon's not over  
I'm just flying along  
Grateful to be so wrong  
Don't stop! I'm inside this

Overwhelming high tide singing along  
My black swan song  
Don't stop! Halcyon's not over  
I'm just flying along  
A queen's love, so strong  
Don't stop! I'm inside this  
Overwhelming joy that I'm living on  
I don't have long
