HTMLOVE

TWRP

What would you say if there was a way
You could be with me?
No matter where you are
Or how far apart
It's easy to begin
To meet me, just log in

Surfin' the web together with you
A virtual world, so shiny and new
Just you and me, baby
Sharing our love
For this new technology, yeah

What would you do if I could see you
And you could see me?
On your computer screen
In 480p
Connecting everyone
Just dial up and have fun

Surfin' the web together with you
A virtual world, so shiny and new
Just you and me, baby
Spreading our love
For this new technology
It's made of wires
Wires, yeah

Magic (Magic)
It's like magic
Magic to some, science to me
Magic (Magic)
It's like magic (mhm)
Magic to some, new technology
Magic (Magic)
It's like magic (oh)
Magic to some, science to me
Magic (Magic)
It's like magic (yes)
Magic to some, new technology

Connecting you to me
Easy as 1-2-3 (1-2-3, 1-2-3)

Surfin' the web together with you
A virtual world, so shiny and new
Just you and me, baby
Spreading our love
With this new technology
In the world wide web

Scrolling and typing and
Laughing and smiling
So many sites to see
Colons and hyphens and
Brand new horizons
New technology

Kilobytes, baby
Must be in the thousands

Gotta get down
Gotta get down
(H-T-M-L-O-V-E)
Gotta get downloading, baby
Baby, I got to download you
(H-T-M-L-O-V-E)
Download you
Download you
(H-T-M-L-O-V-E)
Into my hard drive

Kilobytes, baby
Must be in the thousands
