

Pale Blue Dot

TWRP

Listen up, I wanna tell you something

Ooh, yeah

Mother, daughter, father, son

All actin' like the only one

Our children of the blue dot

Don't take for granted what you got

Alone in this wide galaxy

At least it's far as you can see

Out there is the human race

Spiraling faster and faster, increasing in pace

It's time we thought about the future of planet Earth

Of life on Earth

Of planet Earth

The future of planet on Earth (The pale blue dot)

The future of life on Earth (The pale blue dot)

I'm talking about the future (yeah)

Brother sister all as one

We dance until the morning comes

Out on the dance floor we have found

A reason to lay your weapons down

If we're to reach the stars above

Right here, right now

You must spread love

Love

Love

Love

The stars above, above, ooh yeah

The future of Planet Earth (The pale blue dot)

The future of life on Earth (The pale blue dot)

'Cause it's the only one you've got

From this distant vantage point

The earth might not seem of any particular interest

But for us, it's different

Consider again that dot

That's here, that's home, that's us

On it, every one you love, every one you know, every one you've
ever heard of

The only home we've ever known
