

Roll With It

TWRP

Rollin', we are rollin', oh yeah
How fast they come
Transformations
Now we've got the whole world at our feet
But it doesn't mean we should be looking down
I know that the times may be tough
But we've got to be bold and we've got to be brave enough
To power through, live free and true

You've got to try to
You got to
You got to
You got to roll with it
Roll with it
You got to
You got to roll with it
Roll with it

It comes in waves
What I'm feeling today
Nothing can stop us now
And the way of the world will never be the same
And I know there's a lot going on
But we've got to believe in the facts and believe in love
And they will say that we today
Had found the way to, the way to

The way to
The way to roll with it
Roll with it
You got to
You got to roll with it
Roll with it
Roll with it

The times are changing now
We gotta roll with it
They're going faster now
And they're never slowing down
But we won't quit
We're gonna roll with it
To power through, live free and true
You've got to try to roll with it
