

# Somewhere Out There

TWRP

Somewhere, somewhere out there  
There is something incredible to discover  
Somewhere way, way out there  
There is something that will bring us all together

If we can just keep our shit together  
Long enough to see the stars  
There's no telling how far  
How far we'd go

Somewhere out there stirs  
Something deep inside  
Not so different, you and I  
We all smile and we all cry  
And I know, I know, yes, I do  
I know that we can survive  
And in time, we'll reach beyond the sky

Somewhere, somewhere out there  
There is a home for all the dreamers  
All of us dreamers

We just need to understand one another  
Well enough to heal the scars  
We've all made it this far, so don't let go

Somewhere out there stirs  
Something deep inside  
Not so different, you and I  
We do our best just to get by  
And I know, I know, yes, I do (Baby, I just know we can)  
I know that we can all thrive  
And in time, we'll reach beyond

The sky will be ours  
And someday we will reach the stars  
And we'll live forever

Somewhere out there stirs  
Something deep inside  
Not so different, you and I (Much in common)  
We all vibe or we all die  
And I know, I know, yes, I do (Yes, I know it, baby)  
In peace, we can live our lives (With a little bit of love)  
And in time, we'll reach beyond the sky
