

# Chrome Hearted

Ty Brasel

10 years in but I'm just getting started  
Took me a decade just to learn how to take losses  
Went across the world from my apartment  
Recording in the closet  
Never thought I'd be in Toronto with my dawgs  
When I pop up be deep wit my patnas  
We don't want no problems  
Getting it popping in the metropolitan  
Breaking off the profits with my prophets  
Plotting on dividends, to make big deposits  
Gotta trust the process  
We gone beat the odds one day I promise  
And I ain't talking chrome hearts  
When I say I'm covered in crosses  
But I'm still chrome hearted  
Went through pain and then  
Went through the fire  
Came out Young Tytanium  
Light shining on me it's glowing radiant  
Went from kicking rocks to rocking out a stadium  
I blocked all the curses they was preying in  
Good God, God is good, can I get a amen  
Wave back in town go and tell a friend  
Big campaign, and the movement heaven sent  
And you can't get me out my element  
Nah nah nah can't let the devil win

It ain't nothing that can stop my purpose  
Everything I been through it was worth it  
And I ain't never going back  
I'm on go go go go  
Go go go go  
Go go go go  
Yeah, I'm on go go, let's go, yeah

Young T, God's baby  
I ain't afraid of the pain that's what made me  
I told my fear you gone have to face me  
I was right there on the edge but He saved me  
Yeah you saved me  
Even if they hate me can't let it change me  
Triple cross on my chain cause I'm God son  
Devil tried to take me out but we just begun  
Roll the engine fast shoot out the dust  
Bible on the dash got my foot on the clutch  
Stuck inside the loophole I was loopy  
Broke out of the simulation angels flew me  
Made through hell to tell the tale  
Took to many L's to fail  
Walked a trial that's full of trails  
Can't sell out I'm not for sale  
And you can't get me out my element  
Nah nah nah can't let the devil win
