

Forged In Fire (Interlude)

Ty Brasel

Talking loud but you not saying none
I learned it's less to words and more to action
I had a storm and persevered
Until God made it happen
Forged in the fire stood on ten 'til He said move
This is my lifestyle
I been down worse roads
Struggled to make it through
Had a dream that we gone be alright
And then it came true
Been a while starting to feel the distance
From the life I knew
Back on tour nothing left to prove
It's nothing new
Ease ya mind and cleanse ya soul
Took some time back on the road
City to city on these stages
I been needing a conversation
I just hope you not losing patience
Fall on my knees and pray to God I found my destination
