

LOVE?

Ty Brasel

Now you know I think
The thought of horoscopes hilarious
But you so mysterious
You must be an Aquarius
Out here so close to the ocean
Don't need an aquarium
Starry night tonight
It look like the planetarium
And I feel the vibration
It's magical actually
To the point I wonder
If you'll end up disappearing
I could give my heart to you
If you willing to bear it
And you could give ya heart to me
If you willing to share it

I think I'm in love, I'm in love
I'm in love, I'm in love
I think she my drug, she my drug
She my drug, she my drug
Running through my blood
Through my blood, through my blood
Through my blood
I think I'm in love, I'm in love
I'm in love, I'm in love

Can't get my mind off you
I know I said some things I didn't mean
I'm sorry for my pride, and the lies
And my jealousy
My trauma speaks more than me
I prolly need some more therapy
And self care for me
I'm still high off you
You my drug my amphetamine
The only that takes me, way up to ecstasy
I'm lost without you
Maybe I'm living in a fantasy
Cause I just keep on praying to God
Please don't ever leave

I think I'm in love, I'm in love
I'm in love, I'm in love
I think she my drug, she my drug
She my drug, she my drug
Running through my blood
Through my blood, through my blood
Through my blood
I think I'm in love, I'm in love
I'm in love, I'm in love

Where should I go now
You are not calling no more
If I'm on my own now
Don't know how I'll make it in this world
Where should I go now

You're not around anymore
What's left to show now
Don't know how I'll make it in this world

Where is your love at baby
Where does your faith lie
Where has your heart gone honey
You've runaway and I wanna know
Where is your love at baby
Where does your faith lie
Where has your heart gone honey
Need you to stay and
I think I'm in love I'm in love
I'm in love, I'm in love
