

No More

Ty Brasel

No more, no more
I won't be set back no more
I move the fast pace don't slow it
I lost my way for the last time
But no more, no more
Look, I won't be set back no more
I move the fast pace, don't slow it
I lost my way for the last time, yeah yeah

New levels, new devils, more money, more stress and new sentences
New melodies more infinite, endless gold medals my preference
Success for I'm destined, regrets keep me humble
My sin keep me at the mercy seat, mercy me
I can only imagine dragons in my dreams
I'm stuck in the jungle, it's snakes in the path, it's mud through I'm stepping
Over the track and hurdles, I lost my way on the way, I feel the weight always pressing
Too much pressure before I crumble, I'm honest I got
High blood pressure from this stress, too much
I know I was made for to prosper and such
Soul & spirit, gospel for the beating
Peace all I ask when I pray this season
Odell in the off season, the setback
Set me with the mindset, run with my jetpack
Look at God's son, how I rose through the flame
Look at God's son, rose up took my shame, yeah

No more, no more
I won't be set back no more
I move the fast pace, don't slow it
I lost my way for the last time
But no more, no more, look
I won't be set back no more
I move the fast pace, don't slow it
I lost my way for the last time

No more, no more
I won't be set back no more
I move the fast pace, don't slow it
I lost my way for the last time
But no more, no more
Look, I won't be set back no more
I move the fast pace don't slow it
I lost my way for the last time

Get it right, make that right
I lost my way for the last time
Too much life, look in my eyes
Now it's time to shine

New levels, new devils, more money, more stress and new sentences
New melodies more infinite, endless gold medals my preference
Success brought me more problems than before, uh huh
I share most my problems on my insta story, uh huh
I don't really even like to be social
Antisocial extrovert, my mama know it

Music is my therapy, instrumental psychologist
These melodies heavenly and my flow is the exorcist, whoa
Kicking demons out of my residence, okay
Young T, I got angels on the premises, okay
This is real enlightenment, no pyramids, no
I roll with Yahweh, I got wisdom of old
So they roll with the devil and they claim 666
Well I'm on heaven schedule, rosegold my crucifix, whoa
This time I'm going for the championship, oh boy
I can't stay down, I can't stay down no more

No more, no more
I won't be set back no more
I move the fast pace, don't slow it
I lost my way for the last time
But no more, no more
Look, I won't be set back no more
I move the fast pace, don't slow it
I lost my way for the last time
