

SHINING

Ty Brasel

Pray to God when I wake up
Because I know I'm blessed
Stay wit my bruddas
Cause it ain't too many real ones left
And this life get wild
It'll try to take you next
Gotta keep on shining, yeah
Can't let it break you down
It's better days ahead
Stood face to face with my demons
In the valley of death
They tried to take me out
Guess they don't know who I am
I gotta keep on shining, yeah

Woke up this morning had to thank God
Hit the streets I keep discrete
But I stay on my job
On a mission I can't miss my shot, yeah
Shooting 4 the stars
Just tryna make you proud
Yeah, on the path to greatness
I can't stop, when I set my mind
I can go achieve it all
When the odds stacked
And my back against the wall
Imma show the world, yeah
Imma show em all
Back in the lab I'm a student of the game
I put 5000 nights and days into the
Proof in the pudding my heart and my soul
All that I gave stayed true and you
Tuned in with the truest
Far between and fewest
All my lessons turn to blessings
So I'm not afraid of losing
Just capitalize the W when
The wins fluent, I'm
Cool collected I weathered several
Aggressive and treacherous desperate
Weapons the devil sent
But that was not successful

Pray to God when I wake up
Because I know I'm blessed
Stay wit my bruddas
Cause it ain't too many real ones left
And this life get wild
It'll try to take you next
Gotta keep on shining, yeah
Can't let it break you down
It's better days ahead
Stood face to face with my demons
In the valley of death
They tried to take me out
Guess they don't know who I am
I gotta keep on shining

Cool, I got this light on me
That's why we can wear the same thing
But it look flyer on me
My whole life I believed in things
That my eyes can't see
I know you dealing with real things
You ain't gotta lie when you with me
Gotta let it out and let the pain flow
Once you learn you really not in control
You let the reins go
Every day I thank God
I dodged that bullet like Durango
This ain't no show-off he out an pull it
And let that thang go
Like where his brains go
Father protect yo kids
Said that he would forgive him but changed his mind and he slid
If God was the same way then
None of us would live
If God was the same way then
None of us would live, oh ohh
Open up yo sunroof
And gone an let the sun through
It's time to shine
No more waiting on the perfect time
I think about how we survived
Every attack as I look back
I put my hands together and

Pray to God when I wake up
Because I know I'm blessed
Stay wit my bruddas
Cause it ain't too many real ones left
And this life get wild
It'll try to take you next
Gotta keep on shining, yeah
Can't let it break you down
It's better days ahead
Stood face to face with my demons
In the valley of death
They tried to take me out
Guess they don't know who I am
I gotta keep on shining, yeah

Pray to God when I wake up
Because I know I'm blessed
Stay wit my bruddas
Cause it ain't too many real ones left
Keep on shining, yeah
It's better days ahead
They tried to take me out
Guess they don't know who I am
I gotta keep on shining
