on your face
Look how much you made
You got tricks up your sleeve
Take you to the Hills to fuck on your face
Love me more than the drugs that I take
Neglection from the underworld got you virally
Still falling from the same game you fell for privately
You ought to be where you say you are, but roses don't grow overnight
You took a few bites, I didn't think you was aight
I'll try to get over in my after-life, this life right here ain't aight
I don't even know how I fell for your type, this shit aight
