Ty Dolla \$ign

Crazy vibe, baby, this a crazy vibe  
Step aside, buster niggas step aside  
Recognize me, you gon' recognize me  
Recognize me, you gon' recognize me  
Inspiration, baby, you my motivation baby  
Inspiration, baby, I need extra motivation  
You some inspiration, now we 'bout to hit the latest  
Recognize me, you gon' recognize me

She said she wanna stay over  
But I like to stay all alone  
I fucked that bitch to my song  
I fucked that bitch to my song  
I fucked that bitch to my song  
I fucked that bitch in my song  
I fucked that bitch in my song  
I fucked that bitch in my song

She wanna stay in my home  
I like to sleep all alone  
She kept on blowing my phone  
I fucked that bitch to my song  
Yeah, I fucked that bitch to my song  
I put that bitch in my song  
Twenty, this my favorite song  
So I fucked that bitch to my song  
She throw that ass in a circle  
Smoking on that new purple  
Geeked up off that Urkel  
Throwing that ass in a circle

Fucking on molly and Xans  
Gripping that ass in my hands  
She say Dolla, you the man  
She say Dolla be my man  
She like the way I get money  
I told her leave 'em and he bore me  
She doing tricks with her tongue for me  
She bring her friend and another for me

She said she wanna stay over  
But I like to stay all alone  
I fucked that bitch to my song  
I fucked that bitch to my song  
I fucked that bitch in my song  
I fucked that bitch in my song  
I fucked that bitch in my song  
I fucked that bitch in my song

Twenty my new favorite artist  
Dolla, we just getting started  
She out off the Henny and molly  
Light skinned from the Valley  
I fucked that bitch to my song  
I got somewhere with my drawers off  
Dolla, that's my favorite song  
She say Dolla, that's my favorite song

She say that she wanna stay over  
But I like to stay all alone  
I fucked that bitch to my song  
I fucked that bitch to my song

Ooh-oh-oh  
Ooh-oh-oh  
I fucked that bitch to my song  
Ooh-oh-oh  
Ooh-oh-oh  
She say Dolla you the man  
Ooh-oh-oh  
Ooh-oh-oh
