

Stick with What I Know

Ty Herndon

I know you like cold coffee, black
What makes you cry, what makes you laugh
The way you light up every time I ask
"Honey how was your day?"

I touch your face with my fingertips
Yes I know just how to kiss your lips
When to hold you close, when to let you go

I know everything about you
What I don't know is
What I would do without you
Takin' our time, lettin' our love grow
In a world that's so uncertain
You got a love that's working
I know, I'll stick with what I know

You like jeans with your baseball cap
Walkin' barefoot while the sun goes down
Big old blanket layin' on the grass
Wrapped up next to me
There's nothin' you can hide
I can see it in your smile

I know everything about you
What I don't know is
What I would do without you
Takin' our time, watchin' our love grow
In a world that's so uncertain
You got a love that's working
I know, I'll stick with what I know

I know everything about you
What I don't know is
What I would do without you
Takin' our time, and lettin' our love grow
In a world that's so uncertain
We got a love that's working
I know, I'll stick with what I know

I touch your face with my fingertips
Oooohhhh
And I know just how to kiss your lips
