

The Letter

Tyga

Tell me when to stop... [x4]

Tell me when to stop... [x4]

In the haze we lose, conscious of it all

In the haze we fall, could of had it all

In the haze we lose, conscious of it all

In the haze we lose, conscious of it all

To be honest, I know now

You don't just see, it's not the way you planned it in your mind

I know you do, I know you do

In all honesty there's a time and place you could let me know I'll listen,

I know what to do, you know what to say, tell me what it is you feel

Don't be shy, don't be shy

I'm testing you like you testing me

I'm testing you while you testing me, I know

I'm testing you like you testing me (Oooh I)

I'm testing you like you testing me,

I know (I know, I know)

I know (I know)

I know (I know)

I know it and you know it that I know

I know (I know)

Uh, watching the stars

On a yellow brick road like the Wizard of Oz

Ain't no workin titles for this little thing of ours

I tell you the game like I'm Robert Steiner

Put roses on my neck, rose petal massages

I kiss you down low but I let you decide

I get behind you like you're making dirty wine

Get you a glass of muscato, that's yo favorite wine

And I... know

Can't hold yo prop cause it's yours

Like Versace models you'll be dipped in leather

You my bread and butter, let's toast

And I... hope

Like Shepard's Fairey we can fly canaries

Obey my presence, you are a blessing

I am a reverend so start confessing

In the haze we lose, conscious of it all

In the haze we fall, could of had it all

In the haze we lose, conscious of it all

In the haze we lose, could of had it all

I'm testing you like you testing me

I'm testing you while you testing me, I know

I'm testing you like you testing me (Oooh I)

I'm testing you like you testing me,

I know (I know, I know)

I know (I know)

I know (I know)

I know it and you know it that I know

I know (I know)
