

A New Heartbeat

Tygers of Pan Tang

Who do you think we are?
Messing around with everybody's life
Who do you think we are?
We still believe we've got the right

The right to be wrong
The power to show we're strong
Enough to spread our word and no other voice at all

Close to the edge leaving no footsteps
Out on the ledge we can make it till the end

Hold on tight to your dreams at night
'Til the morning light
Built with them a new reality
Let them live, fill the streets
Accept no defeat
Give the world a brand new heartbeat

Is it right to be afraid?
When you feel nothing but pain
Is it right to be afraid?
Don't give up, you can still play the game

A game without end
You can't log out my dear friend
You're part of it no matter what you think I guess

Close to the edge leaving no footsteps
Out on the ledge we can make it till the end

Hold on tight to your dreams at night
'Til the morning light
Built with them a new reality
Let them live, fill the streets
Accept no defeat
Give the world a brand new heartbeat
