

Light of Hope

Tygers of Pan Tang

Living on the breadline
Nowhere to go, got so low
Problem is it won't let go
See what life has taught you
And brought you to your knees

Heaven knows there's something out there
Something that can save us

A light of hope will shine upon us
And liberate the world (from its chains)
A glimpse of truth is there to heal us
But we're too deaf to hear its call

I can't see their faces, can't go places
I'm no longer free
I'm losing my direction, there's no connection
Of how things used to be

Heaven knows there's something out there
Something that can save us

A light of hope will shine upon us
And liberate the world (from its chains)
A glimpse of truth is there to heal us
But we're too deaf to hear its call

Too deaf to hear its call
Too deaf to hear its call

A light of hope will shine upon us
And liberate the world (from its chains)
A glimpse of truth is there to heal us
But we're too deaf to hear its call

Too deaf to hear its call
Too deaf to hear its call

Too deaf to hear its call
