

Heaven On Dirt

Tyler Farr

Thought I knew this town
Thought I know these roads
But looking at them right now, baby, I don't know
All I see is gold in these high beam lights
Something in your eyes something in your kiss
Taking me somewhere that I've never been
Out here lookin' down on the moon tonight
Yeah, tonight

You got me flying on a cloud right now
The way you look in that rearview
Sure makin' me want to
Pull it over maybe slow it on down
Let your wild go crazy
Slide on over here baby
Take our time let the night get to work
Girl, you're making these backroads feel like
Heaven on dirt

I wanna put it in park and put my hands on you
Let you hang them stars wherever you want to
Keep this red clay high spinning me around
I ain't ever coming back down

You got me flying on a cloud right now
The way you look in that rearview
Sure makin' me want to
Pull it over maybe slow it on down
Let your wild go crazy
Slide on over here baby
Take our time let the night get to work
Girl, you're making these backroads feel like
Heaven on dirt

I thought I knew this town thought I knew these roads
But looking at them right now baby I don't know

You got me flying on a cloud right now
The way you look in that rearview
Sure makin' me want to
Pull it over maybe slow it on down
Let your wild go crazy
Slide on over here baby
Take our time let the night get to work
Girl, you're making these backroads feel like
Heaven on dirt, yeah
Making these backroads feel like
Heaven on dirt
