

One More

Tyler Glenn

It's always me and you against the world, I swear
I could be like anybody else, I don't fight fair
But you don't care

It's always me and you against the world, my god
Spend an afternoon inside your room watching Sci-Fi
You get me high

And if you give me just one more night
I could prove that there's a God
And if you give me just one more try
I was liking you a lot

I know it's crazy and insane
I think it's weird when you're away
It's you I adore
So give me one more, one more

It's always me and you against the world, by far
We could be like anybody else in a parked car
But I've got your heart

It's always me and you against the world, my god
Spend a decade letting go of shame and then we'll talk
I'm gonna walk, I gotta walk

But if you give me just one more night
I could prove that there's a God
And if you give me just one more try
I was liking you a lot

I know it's crazy and insane
I think it's weird when you're away
It's you I adore
So give me one more, one more, one more

I know, I know it's never too late
Never too late, never too late
I know, I know it's never too late
Never too late, never too late

And if you give me just one more night
I could prove that there's a God
And if you give me just one more try
I was liking you a lot

I know it's crazy and insane
I think it's weird when you're away
It's you I adore
So give me one more, one more, one more

It's never too late
Never too late
Never too late
One more, one more
