

# Inhale Exhale

Tynisha Keli

Heyyy Yeah  
It's been a long long time  
Uh

Yeah I get it, I get it we break up and make up and right back to livid  
Right now my head is still spinning from yesterdays argument I just ain't winning  
Now do you get, do you get it I'm sick of not getting what I'm putting in this  
Making my exit (exit) but you gone regret this I promise that you won't forget this

All along I was your rider on your right when things were going left boy  
Through this storm was right besides ya who was down when weren't at your best baby  
That was me faithfully now I'm rolling up the kush to forget everything  
They numb my feelings cause they lead me to trouble  
You took my heart want it back on the double

You, you are my greatest mistake  
You did me wrong and I stayed anyway  
(And I) I know you came up hill you  
You take what you can and dip  
But I'm gonna get over real  
Inhale the good shit, exhale the bullshit

You must think that I'm kidding  
No calm down, no come around  
What time passes don't cha  
But I wouldn't be so sure cause this time the drum lines have all been crossed over  
Been telling you from the beginning  
Don't break my trust, don't take my love  
Don't get caught up in it  
That would be the end (the end)  
You had to try me I'm saying bye but don't forget

All along I was your rider on your right when things were going left boy  
Through this storm was right besides ya who was down when weren't at your best baby  
That was me faithfully now I'm rolling up the kush to forget everything  
They numb my feelings cause they lead me to trouble  
You took my heart want it back on the double ooh

You, you are my greatest mistake  
You did me wrong and I stayed anyway  
(And I) I know you came up hill you  
You take what you can and dip  
But I'm gonna get over real  
Inhale the good shit, exhale the bullshit

Don't say 'baby don't go' cause I'm already gone (inhale exhale)  
You see I wrote it all up in the stars now my memory's gone too (inhale exhale)

Don't say 'baby don't go' cause I'm already gone (inhale exhale)  
You see I wrote it all up in the stars now my memory's gone too

I'm gone

You, you are my greatest mistake  
You did me wrong and I stayed anyway  
(And I) I know you came up hill you  
You take what you can and dip  
But I'm gonna get over real  
Inhale the good shit, exhale the bullshit

Inhale the good shit  
Exhale the bull shit (bull shit...)
