

I'm tired and bored
I can't tell if I'll survive your words
Exhausting, corrupting

But I won't fold
I won't let myself be the first to fall
Rest assure
That if I die, I'll kill you first

So scream, scream out loud
No one can hear your filthy mouth
All the words you said
And now you wish that you never did

Shoot your mouth off
Talk big and brave for all I care
I never listen, I never listen

I'll fill your mouth with gasoline
I'll light you up, I'll be a fiend
You're like a star
I'll make a wish and watch you burn

So scream, scream out loud
No one can hear your filthy mouth
All the words you said
And now you wish that you never did

I'll take my time and make it worth my while
And I will give you hurt
The bigger you think you are
The harder I think you'll fall

I'll come for you and your so called dreams
Renounce your hope, I'll cut you clean
I'll make you crawl, I'll make you bleed
Pull out your tongue, I'll make you

Scream, scream out loud
No one can hear your filthy mouth
All the words you said
And now you wish that you never did

I'll take my time and make it worth my while
And I will give you hurt
The bigger you think you are
The harder I think you'll fall
